

The Value of Your Region –The American Baptist Churches of Metro New York

Big Picture

The American Baptist region (ABCMNY) is an active link in living out the *Associational Principle* among American Baptists. This means that local American Baptist churches, although autonomous in their governance, choose to be in active relationship, or linked with churches that are similar to each other in polity, legacy, tradition and mission commitments. Churches in any association, including ABCMNY vary in size, composition, theology, geographic location and experience of the world, but they share a common history, esteem Baptist principles and practices, and have a similar understanding of the nature of our triune God.

Your American Baptist Region helps provide coherence and connection of your local church to American Baptist mission and witness and cooperative work in the world. Your region is the closest and most direct American Baptist resource and a relationship we hope local congregations' value as they look beyond their own church walls and surrounding communities, to see further, more deeply and clearly and to respectfully acknowledge and accept our differences as opportunities for collective discipleship and mission. ABCMNY helps churches in our region to not be isolated from one another and to embrace a common mission with other American Baptists churches, that we pray, impact the region – a primary mission field, the US and the globe

The Region works to safeguard the integrity of ministry through its related churches and encourage the living out of our value system. (Refer to ABCMNY values statement). The ABCMNY region is often the initial contact for American Baptist churches and persons to help them navigate their relationship to ABCUSA.
